Overview

- Large 8" widescreen display with 256-level color gradient
- Bandwidth up to 200 MHz
- 1 GSa/s sample rate
- 14 Mpts maximum record length
- 16 digital channels with logic analyzer (MSO models)
- Serial bus decoding supporting I2C, SPI, UART/RS232, CAN, and LIN protocols (Decode upgrade)
- Built-in Function and Arbitrary Waveform Generator comes standard on all models
- 60,000 wfms/s maximum waveform capture rate
- FFT including seven other math functions: Addition, Subtraction, Multiplication, Division, Integration, Differential, and Square Root
- 36 automatic measurements
- Standard LAN and USBTMC-compliant USB device port
- 3 Year Warranty

Front Panel

8-inch TFT-LCD display

8-inch high resolution TFT-LCD display lets you see more details in your signal.

Serial Decoding

Decode and analyze I²C, SPI, UART/RS232, CAN, and LIN protocols and display results in binary, decimal, hex, or ASCII in real-time. Enabled with decode upgrade or try 30 times for free with each unit.

Arbitrary Waveform Generator (AWG)

Generator (AWG)

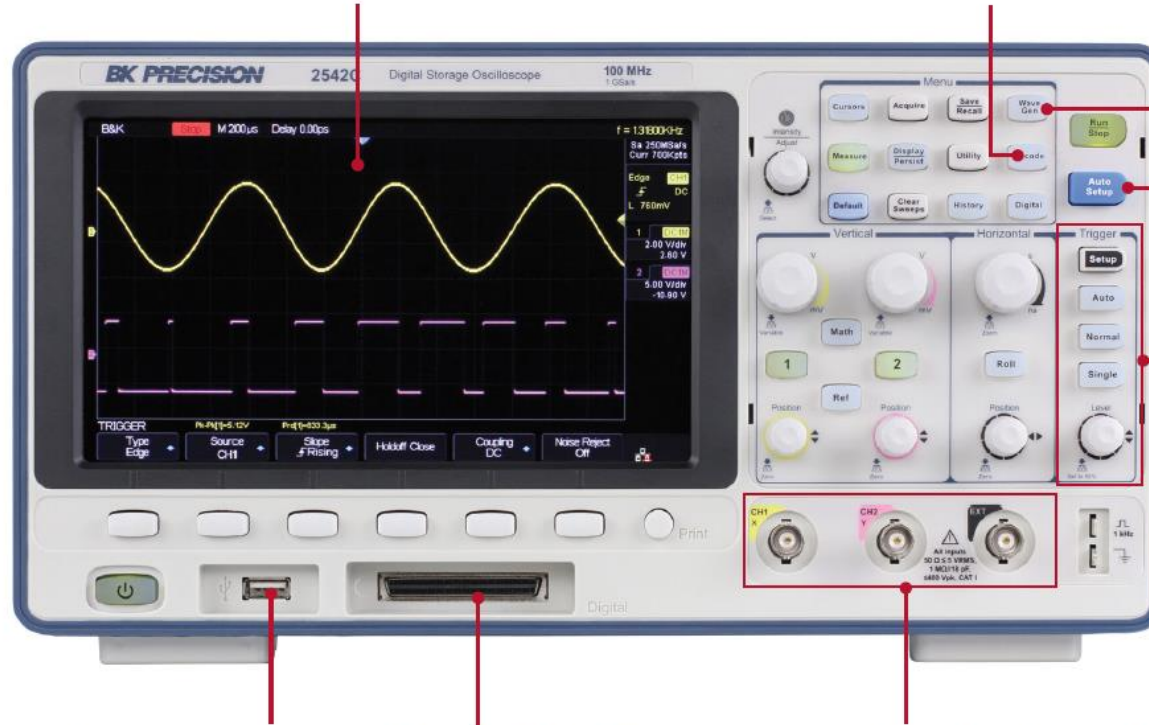

Built-in 25 MHz AWG comes standard in all models.

Auto setup

Vertical, horizontal, and trigger controls are automatically adjusted for fast signal display.

Advanced Triggering

9 standard and 5 serial protocol triggering modes.

USB host port

Connect your USB flash drive to conveniently store and recall waveform data, setups, and screenshots.

16-Channel Digital Ports

Connect a logic analyzer probe to access 16 digital channels enabled with MSO upgrade or try 30 times for free with each unit.

Intuitive channel operation

Both channels in the 2540C Series are clearly indicated by their own color, labeled on the input, knobs, and display.

The tools you need

Waveform History and Recording, Function and Arbitrary Waveform Generator

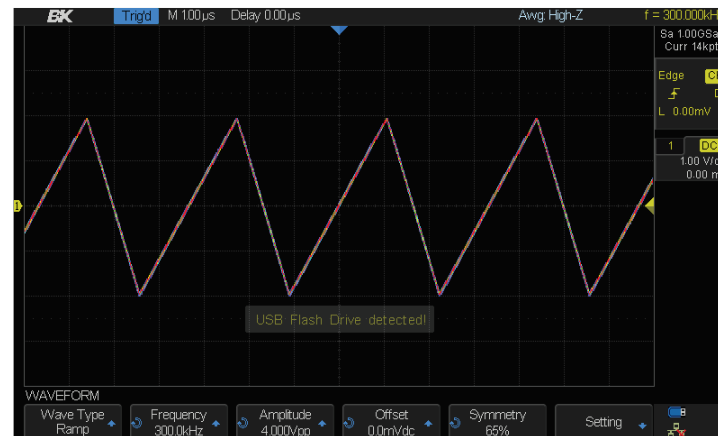

Waveform History and Recording

Quickly scroll through millions of points with History Mode's playback functionality to find difficult to capture events. Eliminate unnecessary idle signals and dead-time by selectivity capturing up to 80,000 segments.

Function and Arbitrary Waveform Generator

A powerful 25 MHz function/arbitrary waveform generator comes standard in the 2540C Series. Use complimentary software to generate waveforms and load up to 4 arbitrary waveforms into the instrument. Built-in functions are sine, square, ramp, pulse, DC, noise, cardiac, Gaussian pulse, and exponential rise/fall.

The tools you need

Automatic Waveform Math and Measurement, Color Grading

Automatic Waveform Math and Measurement

Display 36 automated measurements that include voltage, time, and statistics. Arithmetic and FFT functions can be performed on analog channels and two reference signals.

Color Grading

With 256 levels of color grading, the most common occurrences are represented in red and the least common are represented in purple. Easily spot outliers as they will persist for a user specified time.

The tools you need

Hardware Pass/Fail and Masking, PC connectivity

Hardware Pass/Fail and Masking

Perform up to 60,000 pass/fail decisions a second. Easy to generate masking templates help capture anomalies even with complicated waveforms..

PC connectivity

PC software is provided (free download at www.bkprecision.com) for seamless integration between the oscilloscope and PC. Capture and transfer waveforms, screen images, setups and measurement results to a Windows PC via the USB device port on the back of the instrument. A USB host port on the front allows for quick and easy screen saving.

The tools you need

Included in all MSO models : MSO license - LA2540C, 16 channel logic probe - LP2540C

MSO license - LA2540C

The 16 integrated digital channels are displayed along-side analog channels allowing users to view up to 18 time-correlated channels with shared triggering and acquisition on one screen. The LA2540C license enables the 16 digital channels of the 2540C Series and is included with MSO models.

16 channel logic probe - LP2540C

The 16-channel color-coded logic probe consists of two eight-channel pods. To make contact with the DUT, the probe connects directly to square pins or clips to test points using the included grabbers. With an input capacitance of only 8 pF and 100 kΩ input impedance, the probe protects the integrity of your signal. The probe is included with MSO models.

The tools you need

Decode license - DC2540C

Decode license - DC2540C

Select up to 2 serial bus protocols I2C, SPI, UART/RS232, CAN, and LIN and decode concurrently from analog and MSO channels. Decode information in real-time and display in binary, decimal, hex, or ASCII.

Buy now, upgrade later

Install the MSO and decode licenses at any time or try before you buy with the 30 trial license on each model. Any DSO model in the 2540C Series can be upgraded to an MSO. Installation is quick and easily done within the oscilloscope menu.
